

Outdoor Wall Art & Screening

Outdoor Wall Art and Screening

Producing iconic pieces outdoor metal sculptures and screens, Q Design are proudly based in Perth, Western Australia and produce one of the most extensive collections of outdoor screening and wall art that can be viewed and purchased exclusively at WG Outdoor Life. The metal screens can be used in fully exposed outdoor or indoor applications such as wall art, garden gates, privacy screening, illuminated light boxes, fencing infills, architectural cladding and trellising for plants. These pieces can be made from;

Corten Steel

Also known as Lyten or Weathering steel, suitable for internal or external applications. It develops a unique natural patina that changes as it ages. It is important to note that the Corten steel may leach during the ageing process.

Powder Coated Aluminium

Aluminium won't age like the Corten Steel and the powder coated colour range is extensive. The 'rust' look can be achieved by choosing the 'Corten' powder coat colour.

Stainless Steel

Available in brushed or mirrored finished, indoor and outdoor grades available depending on your requirements.

Tips from the experts

- Mount the screens a few centimetres out from the wall for stunning shadows during the day, add lights for maximum impact at night.
- When made in larger sizes, it's recommended to have folded edges to reinforce and strengthen delicate designs.
- Standard sheet sizes are 2400 x 1200mm, however most of our laser cut screens are custom made to the exact size you require.
- Lead time is approximately 3-4 weeks.

How to Order

Most screens and sculptures are made to order and are quoted individually in accordance to the specific pattern, material, finish and size required. Please contact us with your requirements on **9443 7993** or **info@wgoutdoorlife.com.au** so we can provide you with an accurate quote.
