

Vertical Gardens

Vertical Gardens - a growing design trend

Introducing our NEW Vertical Garden System by Wall Garden Australia. Our Vertical Garden systems are trending right across Perth, creating living, breathing visual feasts in concrete jungles everywhere.

Bars, offices, homes, fences, sheds - any vertical surface is a blank canvas to unleash your imagination. Green walls don't just look luscious, they're practically perfect too. So don't hold back - it's time to go all out with wall gardens Perth.

Benefits

Satisfied plants - With more soil for each plant you will have better water retention lush, greener, happier plants.

Highly water efficient - saves 80% more water than if you planted the same plants in the ground.

Luscious statements - Vertical gardens are space savvy, improve air quality, suppress noise and add ambience

Flexible and functional - Rearrange your herbs, veggies, flowers or plants as needed. You can even take it with you when you move house.

Simple to DIY - All you need is a screwdriver, drill and everyday supplies from your local hardware store to bring your green wall to life.

Easy to water - Simply water the top row by hand or fit a low pressure 13mm poly irrigation system to the top row.
