

## The Mona Self-Watering Tank System

## Save water

Prevents over watering and evaporation.

## Easy care

Keep your plants happy while you're away, with watering usually only required every 3-6 weeks.

## Bigger, stronger, healthier plants

The reservoir air space oxygenates roots for better health, while direct root watering promotes rapid growth.

## Less mess, less stress

Prevent water stains and messy runoff on tiles, decking, roof terraces and balconies.

## Fertiliser friendly

Fertilisers are confined within the container, meaning you'll use less of it, and get more out of it.

## How it works

- Fill the reservoir by pouring water through the black down pipe that sits just above soil level (use your plants to hide it discreetly if you like).
- Water and oxygen are drawn upwards from the reservoir into the soil around the roots as needed (over time, the roots will grow into the reservoir).
- A float in the down pipe lets you know when it's time to refill

## Easy Installation Instructions

1. Check the height of the Mona reservoir against the planter. Your plants root system need to be no more than 15 cm above the reservoir.
2. Add potting mix (or a filler such as blue metal or expanded clay) to elevate the Mona reservoir to the correct height. Make sure it's stable and level.
3. Add peat moss to the centre cone, ensuring you gently compress to remove any air pockets. Then place it firmly back into place. Add a layer of peat moss on top of the Mona reservoir.
4. Place the plant with the roots above the system and backfill with potting mix. Ensure the filler pipe is straight with no kinks.
5. Fill tank via the filler pipe with water to suit volume of the tank. Eg 10L Tank fill with 10L of water.

Available sizes

| Round | Dimensions | Filler Pipe Height | Water Holding | Price |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Mona Tank 1 | $150 \times 65 \mathrm{~mm} \mathrm{H}$ | 210 mm | 1L | \$6.50 |  |
| Mona Tank 2 | $210 \times 65 \mathrm{~mm} \mathrm{H}$ | 335 mm | 2 L | \$39.00 |  |
| Mona Tank 4 | $240 \times 100 \mathrm{~mm} \mathrm{H}$ | 460mm | 4 L | \$49.00 |  |
| Mona Tank 6 | $240 \times 150 \mathrm{~mm} \mathrm{H}$ | 590 mm | 6L | \$59.00 |  |
| Mona Tank 10 | $390 \times 100 \mathrm{~mm} \mathrm{H}$ | 590mm | 10L | \$89.00 |  |
|  |  |  |  |  |  |
| Rectangular | Dimensions | Filler Pipe Height | Water Holding | Price |  |
| Mona Tank 3 | $630 \mathrm{~L} \times 130 \mathrm{~W} \times 65 \mathrm{~mm} \mathrm{H}$ | 335mm | 3L | \$99.00 |  |
| Mona Tank 7 | $550 \mathrm{~L} \times 150 \mathrm{~W} \times 100 \mathrm{~mm} \mathrm{H}$ | 590 mm | 7 L | \$129.00 |  |
| Mona Tank 24 | $900 \mathrm{~L} \times 200 \mathrm{~W} \times 150 \mathrm{~mm} \mathrm{H}$ | 590 mm | 24L | \$249.00 |  |
| The rectangular tanks can be linked together to suit longer planters. |  |  |  |  |  |
| Square | Dimensions | Filler Pipe Height | Water Holding | Price |  |
| Mona Tank 25 | $420 \mathrm{~L} \times 420 \mathrm{~W} 210 \mathrm{~mm} \mathrm{H}$ | 590mm | 25L | \$289.00 |  |
